

ASHWIN R

Data Analyst | Business Analyst | SQL | Python | Excel | Tableau

Puducherry, India | Open to Chennai, Bengaluru, Remote | 9655976480 |

ashwin2000achu@gmail.com | linkedin.com/in/itsashwinr | github.com/itsashwinr

PROFESSIONAL SUMMARY

Aspiring Data Analyst with experience in data analysis, reporting, and regulatory compliance. Skilled in SQL, Python, and Excel for data cleaning, validation, and visualization. Experienced in writing SQL queries, creating dashboards, and generating actionable business insights. Strong ability to transform raw data into meaningful insights to support decision-making

CORE SKILLS

Core Competencies: Data Analysis | Data Cleaning | Data Validation | Reporting | KPI Reporting

Technical Skills: SQL | Python (pandas, NumPy) | Excel (Pivot Tables, XLOOKUP) | Tableau

EXPERIENCE

Regulatory Compliance Executive

Allreach Commodities India Pvt Ltd | Apr 2022 – May 2024

- Analyzed client, transaction, and regulatory data using Excel to ensure compliance with exchange and regulatory requirements.
- Performed data validation and reconciliation using Excel functions such as VLOOKUP/XLOOKUP, IF, COUNTIF, and Pivot Tables
- Prepared daily, weekly, and monthly compliance reports for management review.
- Maintained large datasets and ensured data accuracy for regulatory filings and internal reporting.
- Created Pivot Table reports and dashboards to monitor compliance metrics and operational performance
- Assisted in regulatory audits through data collection, validation, and reporting activities.

PROJECTS

Super store Analysis Dashboard | MySQL, Tableau, Excel

[GitHub Repository](#) | [Tableau Dashboard](#)

- Analyzed 9,994 retail sales records using MySQL to evaluate sales performance and profitability.
- Performed business analysis including sales by region, category, segment, and city-level performance.
- Built an interactive Tableau dashboard featuring KPI cards, regional analysis, profitability insights, and business filters.
- Analyzed the relationship between discounts and profit to identify factors affecting profitability.
- Generated actionable business insights through data visualization and dashboard reporting.

Retail Inventory & Sales Performance Dashboard | MySQL, Tableau, Excel

[GitHub Repository](#) | [Tableau Dashboard](#)

- Analyzed retail inventory and sales data using MySQL to identify revenue trends, inventory risks, forecasting accuracy, and promotion effectiveness.
- Developed SQL queries using aggregations, grouping, filtering, and business KPI analysis to answer key retail performance questions.

- Built an interactive Tableau dashboard featuring KPIs, regional revenue analysis, top-performing products, forecast error tracking, and inventory optimization insights.
- Identified products requiring restocking and evaluated the impact of promotional campaigns on sales performance.
- Published the dashboard on Tableau Public and documented the project on GitHub.

Employee Performance & Attrition Analysis | SQL, Tableau

[GitHub Repository](#) | [Tableau Dashboard](#)

- Performed workforce analytics on 1 Lakh employee records to uncover trends in performance, productivity, employee satisfaction, and attrition.
- Conducted department-level analysis to compare performance scores, overtime utilization, salary expenditure, and workforce distribution across business units.
- Investigated employee retention factors by examining the relationship between satisfaction levels, performance ratings, and resignation patterns.
- Designed an interactive Tableau dashboard with workforce KPIs, departmental benchmarking, attrition monitoring, and employee performance insights.
- Identified employees at potential risk of burnout and turnover by analyzing overtime hours, satisfaction scores, and performance metrics.
- Delivered actionable HR insights to support workforce planning, employee engagement initiatives, and data-driven decision-making.

Data Analysis & Reporting Project | Python, Pandas, NumPy, Matplotlib

- Cleaned and analyzed datasets using **Python (pandas, NumPy)**
- Performed exploratory data analysis (EDA) to identify trends and patterns
- Created visualizations using **Matplotlib** to present insights
- Generated actionable insights to support business decision-making

EDUCATION

B.Sc Computer Science | RAAK Arts and Science College | 2018 – 2021

PROFESSIONAL TRAINING

The Data Science and Machine Learning Program | Scaler Academy | 2024 – Present
